

CDNA

OUTSTANDING ITEMS

What we still need from CDNA

Prepared by **Dev em Dobro**. Following the daily of 16 September 2026. Scope: the public website only — every item listed here sits with CDNA.

Following the daily of 16 September, this is the complete list of what is outstanding on your side. Every slot listed here is already built and working on the site — each one currently shows a colour panel, a marked placeholder or a stand-in image. Nothing is broken; it simply has no content yet.

The case study spreadsheet you sent today unlocked a great deal, and this note exists so the remaining gaps sit in one place rather than arriving one at a time.

What went live on the preview today

- **Clients & Impact** rebuilt to the template you sent, including the *Industries we work in* block from the second image.
- **Case study pages** rebuilt to the adidas layout — the impact band, *01 The challenge*, *02 What we did* with the service chips, *03 What changed*, *04 Client voice* and *05 Related case studies*.
- **All nine signed-off case studies** from the spreadsheet (column B = Yes) are loaded and published: BT, DP World, Dyson, Frasers Property (×2), GSK, Ma'aden, Morgan Stanley and Vodafone.
- **Team page**: the standing team photograph now leads the *One team* section, and the landscape stairs photograph is the page hero. India is out of both Team and About — four regions.

1. Images — 41 files, in nine places

a) Case study covers — 15 images

The largest single gap. One image per case study, and each does double duty: it is the full-width hero of the case page **and** the thumbnail in the Clients & Impact grid.

Landscape, 3:2 or wider, at least 1600px on the long edge.

Needed for: BT · DP World · Dyson · Frasers Property (×2) · GSK · Ma'aden · Morgan Stanley · Vodafone · Shell · Levi Strauss · Coca-Cola · Aviva · Unilever · HEINEKEN.

If fifteen is too many at once, the nine signed-off cases matter most.

b) Industry tiles — 8 images

The *Industries we work in* band. They sit behind a dark veil, so mood matters more than detail. *Landscape; 1200×800 is plenty.*

Energy & Natural Resources · Pharma & Healthcare · Financial Services · Consumer Goods & Beverages · Retail & Luxury · Technology & Digital · Industrial & Manufacturing · Professional Services.

c) Clients & Impact hero — 1 image

The page currently borrows the skyline from About. *Full-bleed landscape, 2400px wide or more.*

d) Client testimonial portraits — 3 images

The *What our clients say* band shows the person beside the quote, as in your template. *Portrait, 3:4, around 600px wide.* These follow whichever three quotes you confirm.

e) Team region tiles — 4 images

These are placeholders that are live right now. The four faculty region cards currently show stock landmarks from Wikimedia — Vizcaya in Miami, Tower Bridge, the Burj Khalifa and Marina Bay Sands. They are free to use, but they are not yours, and they are the first thing an APAC or GCC client will notice.

This is slot 06 in your Team document. *Portrait, 4:5.*

Americas · UK & Europe · GCC & Middle East · Asia.

f) Service evidence band — 5 images

The middle column of the evidence strip on the service pages, beside the metrics. *Portrait, 3:4.* The HEINEKEN one currently shows a stand-in photograph of a HEINEKEN sign.

g) Service card — 1 image

Nine of the ten service cards carry a photograph; **HRLT Effectiveness** is the one without. Same treatment as the other nine.

h) Team portraits — 3 images

Mike Jackson and Genevieve James, which Rhea did not approve, plus the updated Americas photograph that is with Guli.

You also mentioned testing all of them in black and white for consistency — we are happy to apply that in one pass once you have decided.

i) About page photograph — 1 image

You flagged that some faces look distorted in the stretched crop. A wider original of the same photograph solves it without changing the layout.

2. Content

- **Client quotes — seven of the nine case studies have none.** Only DP World and Frasers Property (HRLT) arrived with one. On the other seven the page shows a marked *client quote* — *awaiting sign-off* slot, so the layout is ready the moment they land. Missing: BT · Dyson · Frasers Property (Top 150) · Ma'aden · Vodafone, plus GSK and Morgan Stanley, which are currently showing older quotes carried over from the previous site.
- **The HEINEKEN testimonial on the Top 150 service page** still reads "*A quote from Dolf to be confirmed*" — it is on the live preview.
- **LinkedIn URLs for the team.** Only Rhea's is in the system. The pop-up already has the slot, so this is one line of data per person: Guilherme, Genevieve, Mike, Jon-Paul, Nitin and Phil.
- **Partner logos** for the new partners Rhea is collecting.
- **Books.** The material for Nitin's book, equivalent to Rhea's, plus your view of the page and a real photograph of the books — the current cover is AI-generated and the writing on it is not readable.
- **Insights.** What the team wants the section to be. It stays *coming soon* until then.
- **Rhea's sign-off on the About page.**

3. Decisions

Short answers, and each one unblocks work that is already built.

- **Frasers Property: three years or four?** The cell reads "[3 or 4]-year transformation partnership" and is published exactly as written.
- **Aviva and Shell** are marked FINAL in the status column but *No* under Reviewed. We followed your instruction and filtered on column B, so they are not in. Should they be?
- **Morgan Stanley** is *Yes* under Reviewed but *HOLD* under status. We published it — please confirm that is right.
- **DP World** is missing five cells: the hero headline, the hero sub-head, the *what changed* headline, the closing thought and the CorporateDNA services. The page currently leads with the challenge headline instead.
- **GSK and Morgan Stanley** already carried a long write-up from the previous site, which the new layout replaces. Nothing is lost — it is still stored — but tell us whether to delete it or bring it back as an additional section.
- **Where do the new partner logos go** — the partnerships band, or the logo strip on the Services landing page?

- **The call to action on the service pages.** Your template places the invitation *after* the evidence, and that is how it is built. On the 15th you had asked for it before the evidence. The template wins unless you say otherwise.

The fastest thing you could send

The nine case study covers. They are the one gap that shows on every page at once — the case pages, the Clients & Impact grid and the home page all draw on the same image.
