

CDNA

IMPLEMENTATION STATUS

Corporate DNA — Consolidated Implementation Status

Prepared by Beto & Cadu / Dev em Dobro. In response to the consolidated brief of 05 Aug 2026. First sent 2026-08-06 — **updated 2026-08-10, post-delivery**. Scope: the public website only.

In response to the consolidated brief of 05 Aug 2026 (Nitin's review + JP's observations, coordinated by G). Prepared by: Beto & Cadu / Dev em Dobro. First sent: 2026-08-06. **Updated: 2026-08-10 — post-delivery**. Scope: the public website only (the content system is a separate project that the site feeds from).

Update (2026-08-10): since we sent the 06-08 status, **all the work that was on our side is now built, deployed and validated on the live beta site** — this covers everything in the two "planned" sections below (the site changes *and* the content-system additions). What remains is no longer engineering: it's (a) CDNA content/approvals — the list we sent on 06-08, still awaiting your return; (b) content your team edits directly in the content system; and (c) a few small post-launch polish items. Each item below is now marked with its current state.

How to read this

Every item is tagged with who owns the next move. (*CDNA = the Corporate DNA content owners; "content system" = the tool your team uses to edit page text.*)

Label	Meaning
Done (live on beta)	Built, deployed and validated on the current beta site.
Requires CDNA content or approval	Waiting on CDNA — needs new text, a fact/number to be confirmed, or a sign-off before it can go live (e.g. any client name, logo, quote or figure).
Content-system edit (our team)	A text edit our team makes directly in the content system (renaming, reordering, removing or re-tagging existing entries) — no new build, no CDNA sign-off unless the wording itself is CDNA's.
Recommended immediately after launch	Safe to add right after a solid launch.
Impact on scope or timeline	A note about scope or timing, not a task in itself (see Part B-5).

Most of the page text (Solutions, Cases, Insights, Awards) is stored in the content system, so our team can edit it directly — renaming, reordering, trimming or re-tagging existing entries — without sending it back to CDNA. We only mark **Requires CDNA content or approval** when CDNA has to provide new text or approve a claim (names, quotes, figures).

Delivered — site changes, now live on beta

Status: done, deployed and validated. Everything below was on our side, needed no CDNA input, and is now built and live on the beta site. (Publishing to the production site stays a manual step, on request.)

- 1. Hero sub-headline** → now reads "The leadership challenges that determine enterprise performance." **Done (live on beta).**
- 2. Hero signature** → "Making Leadership Real. Results, Not Promises." now appears together in the top banner. **Done (live on beta).**
- 3. Menu** → reordered to: Solutions | Our Approach | Client Impact | About | Insights; **Cases renamed to Client Impact; About added; The Book moved under Insights.** ("Start a Conversation" stays as the button in the top bar; the logo is Home.) **Done (live on beta).**
- 4. Client Impact page** → new heading "Leadership change, measured where it matters." plus the new supporting text; page title updated. **Done (live on beta).**
- 5. Video heading** → now reads "What global leaders say about us." **Done (live on beta).**
- 6. Global Presence** → "Our offices" renamed to "Our Global Presence" and the map intro paragraph added; the Saudi office is labelled by its city, "**Riyadh**" (matching the brief's hub naming). **Done (live on beta).**
- 7. Data/brand fixes** → the stray "68 members / 16 countries" corrected to "75 / 36"; "CorporateDNA" fixed to "Corporate DNA" in the book text. **Done (live on beta).**

Section structures built (with placeholders where CDNA text is still to follow):

8. **About area** → new About page with all its sections: *Who We Are / Our Identity, Our Story, Our Values & "Keeping It Real", Why We Are Different* (all clearly marked as awaiting CDNA text — nothing invented), plus **Leadership** (the live people list) and **Global Presence** (the live map). About is in the menu. **Done (live on beta)** — the section shells are built; the CDNA copy drops straight in.
9. **Our IP & Diagnostics** → new, prominent section on Our Approach introducing the **5H Framework** (real text), the **DNA 360 Profiler** and the **Team Climate Assessment** — the last two marked "name/overview to be confirmed by CDNA." **Done (live on beta)**.
10. **Global Faculty** → visible faculty section inside About with a regional layout (Europe / Middle East / Asia Pacific / Americas) and the approved "75 across 36 countries" figure; faculty photos and selection still to come from CDNA. **Done (live on beta)**.

What CDNA does next on these sections: send the text for Our Identity / Our Story / Our Values / Why We Are Different, confirm the DNA 360 Profiler and Team Climate Assessment names and overviews, and provide the faculty selection and photos. We drop each into its section — no further building needed.

Delivered — content-system additions, now live

Status: done. These are the new editable sections and fields we added so your team can manage them directly. They are built and live; the remaining step is for your team to fill in and publish the entries.

1. **Editable statistics** → the homepage numbers (years / countries / faculty / % sponsored) are now driven by an editable "Home statistics" area, starting with today's values: 18 / 36 / 75 / 90%. **Done** — values editable by your team.
2. **Solutions evidence/quotes** → each Solution can now carry a list of short client quotes (quote, author, role, optional linked case), shown in a "Client Perspective / Evidence in Practice" block. **Done** — the block is live; **the quotes themselves still need CDNA approval and to be entered.**
3. **Extra Insights fields** → new optional fields on each Insight are accepted: *Originally published on, Original publication date, Source link, Author approved*, and a downloadable PDF attachment. **Done** — fields in place; the external-attribution display is available on request (see Part B-4).
4. **Author approval + "Corporate DNA" fallback** → until an author is approved, the site shows the byline as "Corporate DNA"; the editor still sees the real name. No unapproved author name can appear on the live site. **Done.**
5. **Reports & Resources** → a "Resources" area for downloadable files (title, description, the PDF, optional cover image) is live. **Done** — ready for your team to upload files.

To go live on production: your team fills in the starting values and entries, then we publish.

Part A — Point-by-point response

1. Final navigation, About and identity

Menu — reordered to Home | Solutions | Our Approach | Client Impact | About | Insights | Start a Conversation; **Cases renamed to Client Impact, About added, The Book moved under Insights.** "Start a Conversation" is the button in the top bar; the logo is Home. **Done (live on beta).**

Top banner headline — "*When the stakes are high, leadership must become real.*" **Done (live on beta)** — kept as requested.

Signature line — "*Making Leadership Real. Results, Not Promises.*" now appears together in the top banner. **Done (live on beta).**

Sub-headline fix — replaced "*The high-stakes leadership challenges facing the enterprise.*" with "*The leadership challenges that determine enterprise performance.*" **Done (live on beta).**

About area — the About page is now built. The sections map as follows:

- *Leadership* → the people grid, now placed inside About — **Done (live on beta)**
- *Global Presence* → the offices map, now inside About — **Done (live on beta)**
- *Global Faculty* → dedicated section built with a regional layout — **Done (live on beta) + Requires CDNA content or approval** (selection/photos)
- *Who We Are / Our Story / Our Values & "Keeping It Real" / Why We Are Different* → section shells built with placeholders — **Done (live on beta)** (structure) + **Requires CDNA content or approval** (text)

The About page and its sections are live, with a **placeholder for "Why We Are Different"** (final wording pending from Rhea/JP/Nitin — we did **not** invent it).

Paul Polman quote — in the Book section. **Done (live on beta).** Reusing it in About is optional, not launch-critical.

2. Reframe Solutions around business outcomes

Solution cards and pages are managed in the content system. The seven live entries today are: *Leadership Development, Executive Coaching, Culture Transformation, High-Performing Teams, Women in Leadership, Inclusion & Diversity, Asian Talent Development.*

The requested outcome-led structure and taglines (CEO & Top Team Transformation; Executive Coaching; Leadership & Culture Transformation; Talent & Succession; High-Performing Teams & Manager Impact; Women in Leadership; CHRO / HRLT Effectiveness) is now a **text-rewriting job in the content system** — the "Client Perspective / Evidence in Practice" proof block that supports it is already built and live:

- Re-title / merge existing entries and lead each card with the **outcome sentence**, method underneath. **Content-system edit (our team).**
- New entries **CEO & Top Team Transformation** and **CHRO / HRLT Effectiveness** → create them with placeholders (structure ready); the text **Requires CDNA content or approval** (Rhea still providing).
- Fold **Inclusion & Diversity** into Leadership & Culture Transformation + Women in Leadership, and move **Asian Talent Development** under Talent & Succession (see point 6). **Content-system edit (our team).**

Whether a card leads with the method or the outcome depends only on how the text is written — an editing choice, not a technical change.

3. Make proprietary IP more visible

- 5H Framework under **Our Approach**. **Done (live on beta)** — kept.
 - "Our IP & Diagnostics" section — now built, introducing the **5H Framework**, the **DNA 360 Profiler** and the **Team Climate Assessment**. **Done (live on beta)** + **Requires CDNA content or approval** to confirm the Team Climate Assessment name/content.
 - **5H numbers** — the 5H page still says *"95% of our clients cite 5H® as the real secret of our success ... across 26 countries"* and *"Over ten years and across 26 countries."* These must be **confirmed or removed** before launch — and note **26 countries here clashes with the 36 countries** used elsewhere. **Requires CDNA content or approval** (decision) → then a quick change on our side to apply.
-

4. Video testimonials and client proof

- Heading now reads *"What global leaders say about us."* **Done (live on beta)**.
 - The video is still a **placeholder** — **Requires CDNA content or approval** (final file/URL). To produce the testimonials video, please **share the source video folders with gemeos@devemdobr.com** so we can pass the raw footage to the editor.
 - Of the listed fixes: the video **already loads efficiently and plays inline on mobile** — **Done (live on beta)**. **Captions** will be wired in as soon as the caption file exists — small change on our side, no rebuild. **Caption accuracy, Rhea's name spelling, the duplicate Andrew, and the names/companies/titles are all inside the video itself** → **Requires video editor**.
-

5. Statistics and evidence

- The homepage stats are now **editable in the content system** (previously fixed in the site), starting with **18 years · 36 countries · 75 faculty · 90% Chairman/CXO-sponsored**. **Done**. Good news: none of the riskier figures ("1,200+ leaders coached", "700+ teams", "95% approval") appear on the homepage.
 - Add the two missing approved figures once confirmed: **70+ executive-team interventions** and **1,000+ coaching clients**. **Requires CDNA content or approval** (to confirm) → then editable by your team.
 - **Full number-by-number list** below (Part E). Client-specific metrics (Heineken 45%, Coca-Cola 43, Shell 2,582) live in the case stories, which is where the brief wants them. **Requires CDNA content or approval** (approve each).
-

6. Talent Development

- There is no global "Talent Development" page yet; **Asian Talent Development** exists as one entry and is Asia/APAC-specific. The "2025 Asian Talent Shifts" material lives in that entry's text.
 - Target: **Talent & Succession** (global) + **Asian Talent Development** (regional, underneath it). Create the global entry and move the Asian one under it. **Content-system edit (our team)** for the structure; global text **Requires CDNA content or approval**.
 - If global text isn't approved by launch, **relabel the current page honestly as "Asian Talent Development"** rather than a global title. **Content-system edit (our team)**.
 - **Remove "2025 Asian Talent Shifts"** unless the data/visual is refreshed and re-checked. **Content-system edit (our team)** to remove / **Requires CDNA content or approval** to re-check the data if you want to keep it.
-

7. High Performing Teams and IP protection

The High-Performing Teams detail (the 3–6-month and 9–12-month roadmaps, the full Tools presentation, the detailed scoping process, and the "*#1 priority in 2020*" line) is text, not a build — so removing it is an editing task. **Content-system edit (our team)**.

- Keep one high-level visual and lead with the client problem, the business outcome, what triggers an engagement, the improvement in decisions/execution, and the measurable evidence. **Content-system edit (our team)** (the specific figures still need CDNA sign-off — see Part E). The "one visual" proof layout is available if needed via the proof block, which is already live.
 - We will also review the other Solution pages for over-exposed internal method. **Content-system edit (our team)** (review + trim).
-

8. Testimonials within Solution pages

- The reusable "**Client Perspective**" / "**Evidence in Practice**" proof block is now built and live on each Solution, placed after the first main section. **Done (live on beta)** — the quotes themselves **Requires CDNA content or approval** and need to be entered.
-

9. Client Impact and case taxonomy

- **Cases renamed to Client Impact** in the menu and on the page. **Done (live on beta)**.
 - The page heading is now "*Leadership change, measured where it matters.*" with the supplied supporting text. **Done (live on beta)**.
 - The case filters (industry / service / outcome) update automatically — so once Solutions change, updating the case tags updates the filters. **Content-system edit (our team)** — re-tagging existing cases.
 - Every client name, logo, quote, result and figure remains **Requires CDNA content or approval**.
-

10. Insights, authorship and downloadable resources

The optional Insights fields are now in place: *Originally published on*, *Original publication date*, *Source link*, *Author approval status*, and a *downloadable file/report attachment*.

- Optional fields — **Done**. (The external-attribution *display* on the page is available on request; the fields already accept the data.)
 - **Reports & Resources** (simple upload/download of PDFs/white papers) — **Done** and live; the advanced gated resource centre + lead capture stays **Recommended immediately after launch**.
 - Author handling — default author "**Corporate DNA**" when none is confirmed, plus an approval step so nothing publishes under Rhea/Mike/Gen/JP/Phil/Nitin until approved. **Done** + **Requires CDNA content or approval** (the approvals themselves).
-

11. Global presence, team and awards

- Offices section renamed to "**Our Global Presence**." **Done (live on beta)**.
 - Map intro paragraph ("From our established hubs in London, Singapore, Dubai and Riyadh, together with our Americas presence...across 36 countries.") added. **Done (live on beta)**. Offices: London, Miami, Singapore, Dubai, Riyadh — consistent with the brief's hubs + Americas.
 - **Faculty count inconsistency** — the stray "**68 members across 16 countries**" corrected to **75 / 36**. **Done (live on beta)**.
 - **Global Faculty** — dedicated section built (regional layout, not all 75 profiles). **Done (live on beta)** + **Requires CDNA content or approval** for the selection/photos. (*Faculty photos were confirmed correct — no portrait/AI concern.*)
 - **Awards** section present (fixed list plus an Awards page). Structure kept; names/dates/descriptions **Requires CDNA content or approval** to validate.
 - Team photos: consistent portraits on home, warmer photos on About, **no AI face alteration** — noted; depends on the assets. **Requires CDNA content or approval** (assets) → then placed on our side.
-

12. Editorial, design and technical QA

- **British English** and **5H®** trademark usage are **consistent on the live pages**, and the **5H®** mark was standardised in this round. **Done (live on beta)**.
 - Brand-name slip "*CorporateDNA*" (no space) in the book text → fixed to "Corporate DNA." **Done (live on beta)**.
 - Full editorial/technical check (desktop + mobile, header/footer, links/buttons, image quality, video/captions, accessibility, responsiveness, page speed, case filters, and consistency of titles/roles/locations/figures) → **scheduled to run last**, after the content changes land.
 - Capitalisation / region-naming consistency across all entries — a consistency pass, partly **Content-system edit (our team)** and partly already applied on the fixed copy.
-

13. How we will work from here

- We keep **one shared status tracker** (this document + a live checklist). **Done** (this doc).
 - We support the time-zone handoff model. **Immediate blockers are listed in Part D.**
-

Part B — The consolidated status list

1) Done — live on beta

- Top banner headline "When the stakes are high, leadership must become real." (kept).
- Full menu rework: Cases → Client Impact, About added, The Book under Insights, new order.
- Hero sub-headline swap + the full signature "Making Leadership Real. Results, Not Promises." in the top banner.
- About area with all its sections (Why We Are Different as a placeholder).
- "Our IP & Diagnostics" section (5H · DNA 360 Profiler · Team Climate Assessment placeholder).
- Video heading → "What global leaders say about us."
- Client Impact heading/text swap (case filters update automatically).
- "Our offices" → "Our Global Presence" + map intro paragraph + Riyadh label.
- 68/16 → 75/36 fix and the "CorporateDNA" spacing.
- Global Faculty section (regional layout, photos pending).
- **Editable statistics**, the **Solutions "Client Perspective / Evidence in Practice"** proof block, the **extra Insights fields** + **"Corporate DNA" author fallback/approval step**, and **Reports & Resources** — all built and live; they now need CDNA to enter values/quotes and to be published to production.
- 5H Framework under Our Approach; Paul Polman quote; Awards structure; video loads efficiently + inline on mobile; British English + 5H® consistent.

2) Content-system edits (our team, no CDNA sign-off except the wording noted)

- Solutions re-titled to outcome-led text; fold Inclusion & Diversity into the right categories.
- High-Performing Teams trimming (roadmaps, Tools presentation, scoping process, "in 2020").
- Talent relabel + remove "2025 Asian Talent Shifts".
- Re-tag cases to the new outcome-led categories.
- Capitalisation / region-naming cleanup.
- Awards page text and testimonial/quote text — edited by us, but **the words themselves are CDNA-supplied/approved**.

3) Requires CDNA content or approval (blocks the item) — list sent 06-08, awaiting return

- Final "Why We Are Different" claim (Rhea/JP/Nitin).
- Source text for **CEO & Top Team Transformation** and **CHRO / HRLT Effectiveness** (Rhea).
- **Team Climate Assessment** — confirm name + content.
- **5H figures**: confirm/replace "95% cite 5H" and "26 countries" (and reconcile vs 36).
- **Statistics**: confirm "70+ executive-team interventions" and "1,000+ coaching clients"; sign off the whole approval list (Part E).

- **Final video** (spelling of Rhea, remove duplicate Andrew, correct names/titles, captions).
- **Access to the source video folders** — please share the folders holding the raw testimonial footage with gemeos@devemdobr.com, so we can pass the material to the editor to produce the testimonials video.
- **DNS pointing** — please confirm **how the domain will be pointed to the new site** (who manages the DNS, and the method — nameservers or A/CNAME records), so we can coordinate the go-live cutover.
- **Global Talent & Succession** text (else we ship "Asian Talent Development" honestly labelled).
- **Awards** final names/dates/descriptions.
- Every **client name, logo, quote, result, figure** in cases/testimonials.
- **Faculty selection / regional photos** for the Global Faculty section (photos already confirmed correct).

4) Recommended immediately after launch

- Captions on the testimonials video (once the caption file exists).
- External-source attribution display on Insights (fields already accepted; display on request).
- Professional re-edit of the testimonials video.
- Advanced gated resource centre + lead capture/automation (beyond the simple Reports & Resources).
- Reuse of the Paul Polman quote in About (design-permitting).

5) Impact on scope / timeline

- **No change to the agreed direction.** These items raised the internal pages to the homepage's standard; they were re-writing + targeted builds, not a redesign.
 - All the **new build** items — the About area, "Our IP & Diagnostics", the Solutions evidence/quotes block, editable statistics, and the Insights fields / Reports & Resources — **are now delivered**.
 - **A lot of the remaining Solutions/HPT/Talent work is content editing (our team or yours), not build time** — that can proceed in parallel.
 - The dependency that now most affects timeline is **CDNA content/approvals** (Part B-3), not engineering.
-

Part C — Content edits we'll make directly (no CDNA sign-off, except where noted)

These need no new build. Our team makes the edits below **directly in the content system**. The last two lines still need CDNA to provide/approve the actual words:

- **Solutions:** re-title cards, lead each with the outcome sentence, method underneath; fold Inclusion & Diversity into the right categories.
 - **High-Performing Teams:** delete the 3–6 and 9–12-month roadmaps, the Tools presentation, the detailed scoping process, and the "in 2020" line; keep one high-level visual.
 - **Talent:** relabel the current page as "Asian Talent Development"; remove "2025 Asian Talent Shifts."
 - **Case tags/filters:** re-tag cases to the new outcome-led categories (filters update automatically).
 - General **capitalisation / region-naming** cleanup.
 - **Awards page text:** names, dates, descriptions — **the wording itself still needs CDNA validation**.
 - **Testimonial/quote text** on Solutions and cases (the proof block is live) — **the quote wording is CDNA-approved**.
-

Part D — Blockers (flagged immediately, per the brief)

1. **Content-system publish + fill-in** — the additions (editable stats, Solutions quotes block, Insights fields + author step, Resources) are **built and live on beta**; what remains is filling in the entries and publishing to production. Several "just edit it" items assume that step.
 2. **Insights external-attribution display** — the fields are accepted; showing them on the page is available on request (a small change on our side).
 3. **WhatsApp number** is still a test placeholder — we need the real number for "Start a Conversation."
(Quick change once provided.)
 4. **DNS / go-live cutover** — we need to know **how the domain will be pointed to the new site** (who manages the DNS and whether via nameservers or A/CNAME records) to plan the switch-over.
 5. **Source video access** — access to the raw testimonial footage (share the folders with gemeos@devemdobr.com) is needed before the editor can produce the final video.
 6. All **Requires CDNA content or approval** items in Part B-3 — each one blocks its own section from being launch-final. *(The approval list was sent 06-08 and is awaiting your return.)*
-

Part E — Numeric claims audit (for CDNA approval)

Claim	Where	Status
18 years	Homepage stats	Proposed-approved — confirm
36 countries	Homepage stats + several pages	Proposed-approved — confirm; reconcile with "26 countries" on 5H
75 faculty	Homepage stats + text	Primary reference — confirm
90% Chairman/CXO-sponsored	Homepage stats	Proposed-approved — confirm
95% cite 5H®	5H (Our Approach) page	Validate or remove
26 countries (5H)	5H (Our Approach) page	Validate or remove / reconcile to 36
"Over ten years" (5H)	5H (Our Approach) page	Soft claim — confirm
68 members / 16 countries	A homepage block	Fixed — replaced with 75 / 36
70+ executive-team interventions	(proposed, not yet on site)	Confirm before adding
1,000+ coaching clients	(proposed, not yet on site)	Confirm before adding
Heineken 45% / Coca-Cola 43 / Shell 2,582	Case cards	Client-specific — approve each
1,200+ leaders / 700+ teams / 95% approval	Not published	Keep out unless sourced

Summary

Where the beta stands: the site changes and the content-system additions from the 05-08 brief are **built, deployed and validated on the beta site** — menu rework, hero sub-headline + signature, About area, "Our IP & Diagnostics", Global Faculty, video heading, "Our Global Presence" + Riyadh, the 75/36 and "Corporate DNA" fixes, editable statistics, the Solutions proof block, the Insights fields + "Corporate DNA" author fallback, and Reports & Resources. The brief did **not** change the direction and does **not**, by itself, delay launch.

Split of the remaining work:

- **Done (no dependency):** everything on our side — see Part B-1.
- **We edit straight in the content system (no CDNA sign-off):** Solutions re-titled to outcome-led text, High-Performing Teams trimming, Talent relabel + remove "2025 Asian Talent Shifts", case re-tagging, capitalisation cleanup. (Awards text + testimonial/quote wording sit here too but still need CDNA-supplied words.)
- **We're blocked on CDNA for:** "Why We Are Different" text, CEO & Top-Team + CHRO source text, Team Climate Assessment naming, the 5H "95%/26 countries" decision, the two new stats, the final video, **access to the source video folders (shared with gemeos@devemdobr.com), how the DNS will be pointed to the new site**, global Talent text, awards details, and all client names/logos/quotes/figures. *(This list was sent 06-08 and is awaiting your return.)*
- **After launch:** captions, external-attribution display, professional video re-edit, gated resource centre + lead automation.

Top blockers to unblock first: (1) fill in and publish the content-system entries; (2) the real WhatsApp number; (3) the DNS pointing plan for the go-live cutover; (4) source video access for the editor (gemeos@devemdobr.com); (5) the CDNA content/approval list above — that list, not engineering, is what now gates the launch date.
